

finalists **Kids' Bedroom**

PL Design

Looking at this crisp space, it's hard to imagine that it was once a pink-and-green bedroom—complete with a hot-pink metal bed—unchanged since the client's daughter was a baby. Pavleta Landjeva-Mitev of PL Design started with a soothing palette of white, grays and navy, with bits of orange and pink as bursts of color throughout. "The loft space is really special," the designer says. "We had to open the ceiling and go into the attic to make it more spacious, and we added lighting and electrical wiring for all the gadgets you can imagine." The loft space, the layout of the rest of the furniture, and the mirrored closet doors help the room feel like a spacious getaway. With such a soothing color scheme, Landjeva-Mitev was able to have a little fun with the ceiling by adding navy Quadrille wallpaper and a whimsical coral-inspired light fixture. —NT
